PH49206	29	PH49703	3	
PH49301	17	PH49703	18	Non-woven wallcovering is a natural product, which means that color differences may occur. Light-colored coated wallpapers are more sensitive to these differences and require a thorough preparation of the foundation. Preferably, the foundation should be of a light and uniform color. Alternatively, a plain-covered wallpaper can be placed as base. Plain, glossy wallpaper also requires extra care when preparing the foundation. OPACITY

All rolls of wallpaper in this collection are 53 cm (20.8") wide and 10 m (32.8 ft) long, totalling 5,3 m² (56.9 sq ft)

CERTIFICATIONS AND MARKS

FSC - Forest Stewardship Council
The wallcoverings in this album are FSC certified, which guarantees that they have come from a forest and supply chain that is managed environmentally and socially responsibly.

CE - Conformité Européenne
CE certified products meet EU consumer safety, health and environmental requirements. This means that all wallcoverings in this album adhere to the standards regarding the legally permitted quantity of formaldehyde and other dangerous substances, heavy metals and vinyl chloride monomer.

ENVIRONMENTAL STATEMENT

At Prestige Wallcoverings, we want to supply global markets with wallcoverings that have been manufactured in an environmentally sustainable manner. We use FSC-certified paper from Finnish Ahlstrom-Munksjö for all our non-woven wallcoverings. The factories where our wallcoverings are produced are state-of-the-art facilities committed to minimizing the environmental impact throughout the production processes. As a fast growing company, Prestige Wallcoverings has adopted a long-term strategy that aims at keeping current with all environmental regulations and initiatives in the wallcoverings industry.
